

Databases

Published on weyer gruppe | komplett. durchdacht. (<http://www.weyer-gruppe.com>)

Databases

Coordinated and transparent data and information should be available at all times. We develop tailor-made databases from technicians for technicians that ensure simple schedule control and monitoring.

Services

- Administration system for industrial plants to record licensing data (VFI), inspection dates and hazard evaluations | [weyer special](#)
- Objection management for licensing procedure with public participation to record and manage objections, as well as to prepare and conduct the hearing
- Project-monitoring program and employee-related recording of time worked (PAKO) for engineering and consulting companies
- Customer-specific development of databases

Your benefits

From now on you can filter the necessary data out of the database in seconds. You fulfill your documentation obligations without additional expense.
