## **Our services**

### **allround.**

Since more than 30 years, the weyer group provides highly specialized services according to clients needs within and around process plants. These services include project definitions and process engineering conceptualization from the beginning of the scheduling. The weyer groups provides also exception and approval management at new or reconstruction from plants as well as comprehensive consulting and solutions to problems for plant safety tasks.

### **smart.**

A vast range of specialized services require a lot of expertise, which is provided by the weyer group's experts daily. To benefit from these expertise, the weyer group's experts offer workshops and trainings for almost all fields of business activities - from practitioner to practitioner.
