# **Plant safety**

Your goal is the safe handling of hazardous substances or processes. The protection of personnel and plant equipment must be ensured at all times. We plan the handling of hazardous substances and the relevant technology. As external experts, we supply specific recommendations on how you can comply with statutory regulations as cost-effectively as possible.

## **Services**

- Hazard and risk analyses (e.g., HAZOP, PAAG)
- Application of the German Hazardous Incident Ordinance (Störfallverordnung)
- Fire protection
- Explosion protection
- Water protection
- Hazard evaluations in accordance with the German Operational Safety Ordinance (BetrSichV)
- Classification of hazardous substances and preparations
- CE marking
- Site coordination (safety and health protection planning)
- Support in terms of the REACH Process

## **Your benefits**

You receive field-tested handling concepts and are given the certainty of having protected people and material in an effective way.
