# Simulations

You are looking for solutions to complex problems for which there are, as yet, no standards. Using ultra-modern engineering and simulation tools, our experts depict the process results to be expected.

## Services

- Simulation of complex processes | [weyer special](#)
- Structural mechanics (FEM)
- Pipe statics calculations and pressure surge simulation
- Fluid mechanics
- Simulation of refinery and process furnaces | [weyer special](#)
- Flare systems and simultaneity analyses of sources of emission

## Your benefits

You save, because our reality-oriented planning shows the most cost-effective way in advance – that is, before you invest in equipment.
